

WHY INDIGOVISION?

1. EXPERIENCE

1994
Founded

15,000
Installations

130+ Employees
1000+ Resellers
Delivering to 100+ Countries

2. TRUSTED

We take your security personal!
With rigorous testing and
relentless quality control 365
days a year we ensure that you
invest into a robust, reliable
security system, Control Center.
Just like our 15,000 existing
installations have already done.

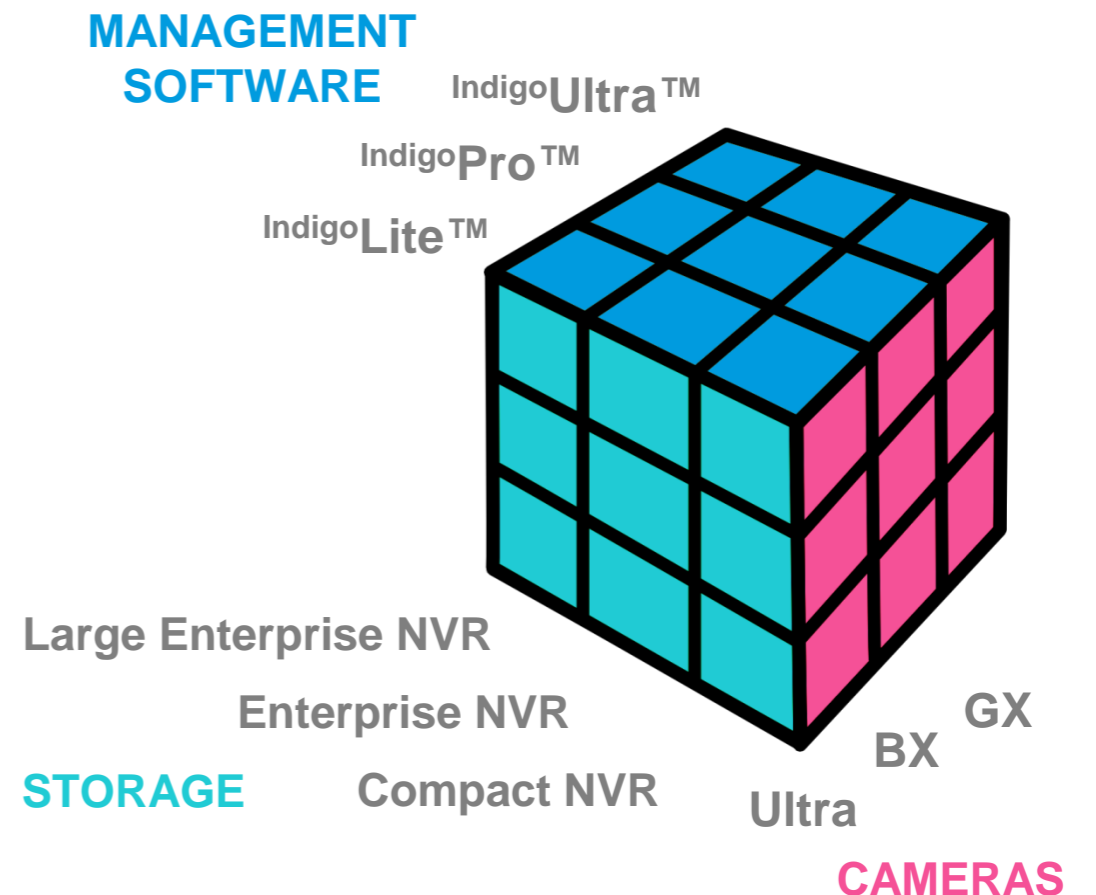

3. END-TO-END

IndigoVision is a complete end-to-end security management solution from **cameras** to **software** to **storage**, so performance and stability go hand-in-hand. And you are future-proofed: the products you buy today will have backwards compatibility for years to come.

4. MIX & MATCH

IndigoVision is a flexible, scalable solution provider who allows you to mix and match any combination of cameras, storage and software to create the most effective security solution for your needs.

5. FLEXIBILITY

Flexibility with IndigoVision is provided throughout the entire product offering. It's about the choice between various cost value propositions within the camera, storage and software product range.

Whatever the size or budget of the project it's about building the solution that's right for you.

6. DISTRIBUTED ARCHITECTURE

IndigoVision's unique **Distributed Network Architecture** removes the need for a central server – so no single point of failure, greater resilience, dramatically reduced latency and no network bottlenecks.

7. SCALABLE

IndigoVision's architecture is completely scalable, you can expand at will, or grow organically: add more cameras or recorders when and where you require.

Even better: Our software workstation installs are free of charge, covering any number of operators for no additional cost.

Easily manage 1 or 100,000 cameras, users or recorders.

8. INTELLIGENT HARDWARE

Cameras and encoders equipped with IndigoVision's unique SMART.core™ technology offer market leading video and **audio performance**. Superior compression means less storage costs and up to **90% lower system costs**. (No that is not a misprint: 90% lower system costs.)

9. OPEN

Our system is end-to-end and open. You can integrate it with other specialised security systems as well as 3rd party cameras.

We are conformant with various industry standards like ONVIF Profile S and OPC.

For IndigoVision 'Open' means everything communicates effortlessly.

A SCALABLE, FLEXIBLE SOLUTION PROVIDER

IndigoVision understand that customers are looking for solutions fitting various requirements.

We provide the experience, flexibility and choice for you to create an easy, scalable security management solution that is reliable and future-proof!

Additionally, you get the freedom to interconnect with other industry specialists, as you would expect from a truly open system.

Safe made easy! **That's why IndigoVision.**
